and Plant Pathology (SLAMPP) - No. 02 of the Talk series

# New trends in plant disease management

by *Dr. U. Aruna Kumara*

Senior lecturer  
Faculty of Technology, University of Colombo

Disease

Accurate plant disease diagnosis and effective disease management practices are two key areas that face ever-growing challenges day by day, especially in the field of agriculture. However, the **innovation of novel technologies** in plant disease management has shown a greater potential in achieving sustainable development in agriculture.

**Dr. U.M. Aruna Kumara** will talk about the conventional and molecular-based plant disease management strategies that would help to shape the future of plant disease detection by advances in artificial intelligence and machine learning results, early warning systems that predict or forecasting models and potential use of plant clinics in disease management.
